4 Fat Loss Mistakes Most Women Make

If you're a woman on a mission to burn fat, there's a good chance you are making one or two (or more) mistakes along the way. I see it time and time again and yet, few women ever actually crack the weight loss code.

It really doesn't need to be as complicated as it seems. By learning what these mistakes are, you can quickly put them behind you and get on track to seeing better results.

Let's look at four fat loss mistakes you need to know about.

Starvation Diets

If 1400 calories is good, 1000 must be better, right? Wrong. Your body needs fuel to burn fat properly. As strange as it may sound, if you cut your calories back too far, your body will just cling onto what fat it does have, making further fat loss feel impossible.

You want to use a moderate calorie deficit, like the

guidelines set forth in the 3 Week Diet plan as this will ensure that your metabolism stays revved and you keep burning fat.

Failing To Plan Ahead

Another big mistake many women make is failing to plan ahead. They think about their next meal about an hour before that meal takes place. Often, this is because they're busy and just don't have time to do all that cooking.

If you want to see results, however, you need to plan ahead. The trick is using a weight loss program that doesn't call for overly complex meals that mean you spend hours each day in the kitchen.

No woman can handle that — you have a life to lead. But, with a diet plan that makes planning ahead simple, you will stand a much better chance of sticking with your menu. You should never wonder 'what to eat' when hunger hits or you'll be tempted to eat something you shouldn't.

Overdoing Cardio Training

If there's one thing that most women have in common, it's hours spent on cardio machines. While some smart cardio training (such as sprint training) can be beneficial for fat loss, you really don't need to chain yourself to the treadmill, bike, or the elliptical. In fact, doing so can do more harm than good.

Instead, what you need is a basic weight training program that focuses on key lifts that make you stronger.

Check out The 3 Week Diet workout program if you need assistance in this area. This program will go over the top calorie burning exercises that will firm and tighten your body while helping you melt fat quickly.

Overcomplicating The Process

Finally, the last big mistake that many women make is overcomplicating their program. They find a diet plan that has a million rules and regulations that they must follow and then wonder why they aren't sticking with it and it's not working.

Simplicity is best. With a few smart guidelines that you can easily implement into your life, you can be on track to seeing superior results.

Fat loss isn't rocket science. It all boils down to fueling your body with the right food choices and amount of energy to encourage the release of energy from body fat cells.

The 3 Week Diet plan will explain how to do this without feeling like you need a Ph.D. in diet lingo.

So keep these mistakes in mind. If you see yourself making any of them, make a few changes and get

yourself on track to seeing better results in the future.

A promotional banner with a pink border. On the left, the text "Lose 21 Pounds In 21 Days! GUARANTEED!" is written in bold, pink, sans-serif font. In the center is a photograph of a woman with long brown hair, wearing a bikini, smiling and making peace signs with both hands. On the right, a pink rectangular button contains the text "START NOW!" in white, bold, sans-serif font.
